

Year 3 Stone Age Experience

The Year 3 classes really enjoyed their Stone Age Experience Day, led by a member of the Warwick Museum Service. The children had the opportunity to handle real artefacts, including arrow heads, flints and other tools made from stone. They explored how these tools changed and became more sophisticated over time and thought about what life might have been like thousands of years ago; from how people found their food through farming, hunting and gathering, to the clothes they wore and the shelters they built.

Each class also had the opportunity to showcase their fantastic project work, transforming the hall into their very own 'Telford Junior Museum'. It was wonderful to have so many parents and carers joining us, to share the children's hard work and their enthusiasm for staging the exhibition
